

Hardy Wilkinson

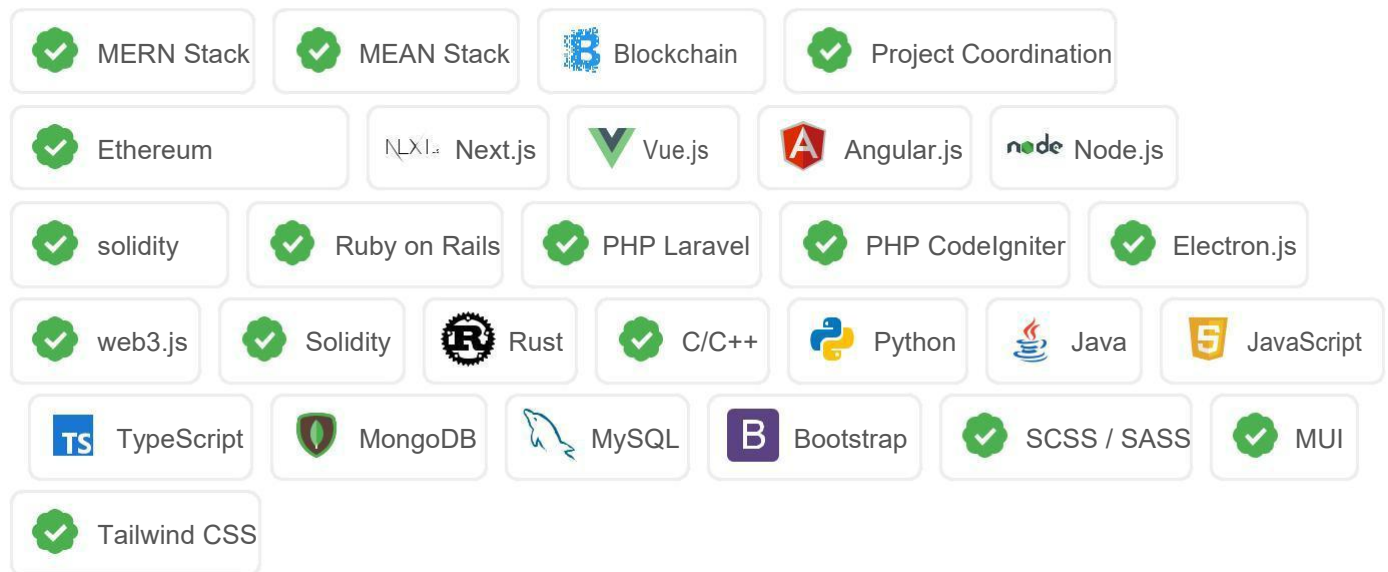

FullStack / Blockchain Developer

📍 Singapore, Singapore hardy.wilkinson918@gmail.com

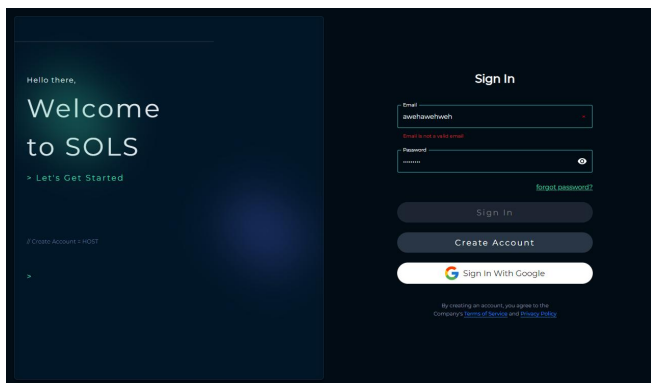

Hi, my name is Hardy Wilkinson and I am a full-stack developer with 7 years of experience.

I have developed dozens of large, custom Web & Mobile applications focusing on a wide-range of industries including government agencies, start-ups, eCommerce, medical, education, real estate solutions and worker safety.

Tech Skills

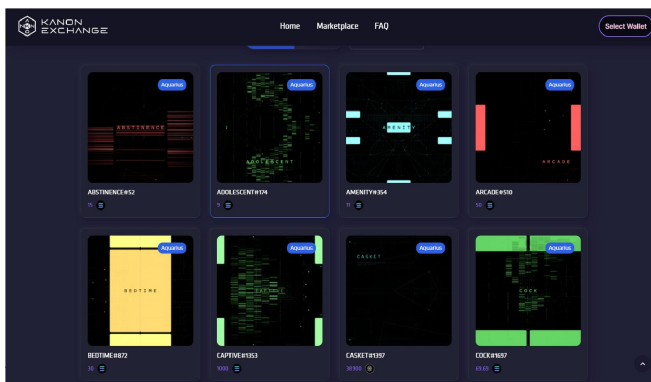

Projects

SOLSAPP

I had a project in progress and the client wanted to finish it in urgent. I worked 50 hours a week and completed it in time. My role was MERN-Stack web developer in this time.

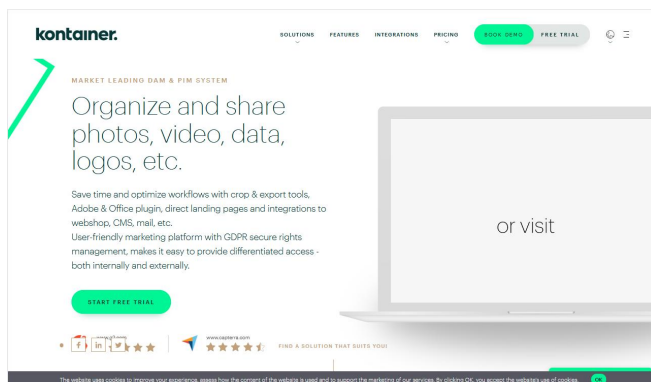

<https://solsapp.com/>

NFT Marketplace

- Built from scratch marketplace in React.js in four months.
- Using Solidity and Web3.js

Work Experience

Senior Developer & Project Manager • DynamiteJobs

March 2022 – September 2022

I am available for any project for companies. * eCommerce Website * Blockchain Projects * NFT minting Sites * NFT marketPlace * Various Platforms * CTO position * MERN/MEAN Stack Special.
* Remote Full Time / Part Time Jobs

React Front-End Engineer • Golden Hippo

October 2020 - December 2021

Golden Hippo Media development

- Ported the Ionic Angular sales funnel to React and GraphQL for rapid prototyping and split testing.
- Ported the underlying deprecated Ionic library to Webpack 5, speeding up local and remote builds by up to six times.
- Developed a method for file exclusion leading to a tenfold local development speed increase in the workflow.
- Ensured quality standards through regular code reviews of contractors' codebase contributions

Lead Instructor • Coding Dojo

April 2020 - October 2020

- Co-authored and piloted a React curriculum at the home campus and assisted in migrating the three-stack program from Angular (MEAN stack) to the MERN stack.
- Served as a core contributor to the program-wide Discord integration, creating a rapid two-click user sign-up process.
- Created a platform-specific CLI to efficiently track Zoom class attendance and push it to the program's back end. This tool was eventually adopted to track course participants on a broader basis.
- Integrated the Gmail API for sending automated, template-driven emails to students.
- Managed two other instructors on-site, supporting all aspects of instruction and campus upkeep.

Full-Stack Developer • BotB

July 2018 - February 2020

<https://Botb.com/>

- Helped the company to migrate from PHP to MEAN-Stack. It resulted in increased code quality, excellent design and increased development speed.
- Helped to test and integrate best programming practices like TDD, continuous integration, and code review.

Education

Singapore Management University
Computer and Information Sciences and Support Services

2012 - 2016
